

Food packaging with bagasse and recyclable paperboard

Sabert Corporation's recent launch of PULP Ultra, a no-intentionally-added-PFAS formulation is made from over 95% bagasse fibres, as well as recyclable paperboard food platters with newly developed lids for quicker construction.

Future product development will continue to balance improved functional performance with reduced environmental impact, while maintaining the quality.

The company said this is underpinned by customer service, product innovation and continued investment in its people and operations.

The group's vision focuses on accelerating organic sales growth across its strong and expanding portfolio of core product ranges. This will also be driven by the creative expertise in designing bespoke food packaging solutions, tailored to the specific needs of a diverse portfolio of global food brands.

The company said it continues to develop the next generation of paperboard, pulp, and plastic solutions, designed to meet and exceed evolving regulatory requirements and customer needs across food-to-go and delivery.

Sabert is a leading global manufacturer of innovative food packaging products and solutions. Our company was founded in 1983 on a single mission: to enhance and advance the way people enjoy food by providing innovative and sustainable solutions. (Source- Packaging News, 23 Feb, 2026).
