

010225 Coater

Valmet to supply off-machine coater in Asia-Pacific

Valmet is to supply a high-speed off-machine coater with automation and services to a customer in Asia-Pacific. The coating machine is designed for coated special paper grades and will include Valmet's latest curtain coating technology. Valmet's delivery will include an off-machine coater with curtain coating technology, coating drying technology, a supply system for the coater, and a broke system. Automation solutions, Valmet Industrial Internet solutions, and spare parts packages support the delivery. In connection with the order of the machine, the technology selection was ensured with pilot tests at Valmet Paper Technology Centre in Järvenpää, Finland.
